

SABOT PETAL DEVELOPMENT

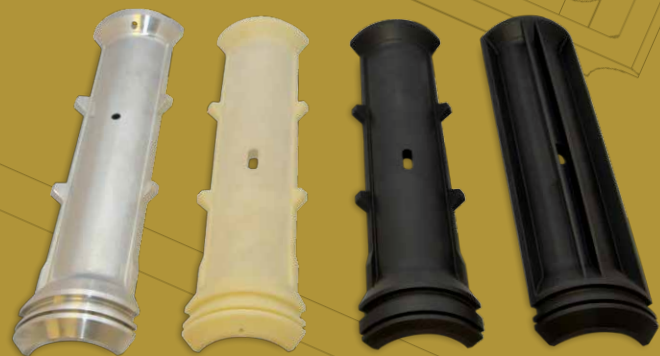

PROBLEM:

The U.S. Military required industry-leading, computer-aided manufacturing and complex prototyping capabilities across a variety of materials to develop innovative hardware and minimize iteration time.

SOLUTION:

Developed over two decades, JAKTOOL's product development and prototyping processes combine old-world craftsmanship with cutting-edge manufacturing capabilities. Integrating seamless client communication with expert craftsmanship, we developed novel manufacturing processes to improve efficiency, which reduced lead time and cost.

CONCLUSION:

Providing outstanding quality and fast turnaround, JAKTOOL transformed innovative ideas into combat-ready technology. Our mastery of development, prototyping, and quality control has made us a preferred vendor to the U.S. Military and allowed us to deliver unrivaled success in the most compressed timelines and vital applications.
